IIC HACKATHON

PROJECT

Life Manager
YOUR ULTIMATE TO DO LIST MANAGER

TOPIC:

Create a fully functional to-do list application where users can easily manage their tasks. Users should be able to add new tasks, edit existing ones, delete them, categorize tasks into different groups (such as work, personal, or urgent), and set deadlines with reminders. Implement task prioritization and filtering options for a better user experience. The app should offer a simple yet intuitive interface, allowing users to organize and track their productivity efficiently

PROBLEM ID: HT103

TEAM MEMBERS:1.Anirban Roy Chowdhury
2.Dwaipayan Bose
3.Soumyajit Ghosh

About project ✕

Life Manager

This is an elementary todo-list application created by team "sdh_cscs" containing members Anirban RoyChowdhury, Dwaipayan Bose, Soumyajit Ghosh for the IIC Hackathon September 2024.

This stores data to the browser's local storage to keep it persistent through sessions. However, clearing your browser's data will also delete the saved to-do list.
